### **HAPPY FORTH OF JULY TO ALL!!**

Here's to all a happy holiday, and please be carefull if you plan to travel over the holiday.  
This months meeting will be informal with some discussions on the 94 project and Hamfest.  
Stay tuned for August! Remember the balloon launch at the first of the year?

*We wish to express our deepest sympathy to the family of Jack Love-K5KNA, who passed away on May 26th. We will have a special article next month.*

Tuesday, July 25th - RACES meeting, 7:30 at Old Police Acadamy..

#### **Events at Club Station for July.**

Club Station will be open Saturdays this month from 10 am to 12 noon.

## President's Letter

Well, we made it through June! although you are reading this after Field Day it was written before Field Day. Hope you had a good time at Field Day, I'm pretty sure I will. July is kind of a let down after all of the activity in June. The Executive Committee was unable to seat a quorum for the June 15th meeting. We will try again some time in July to have an Executive Committee meeting to discuss the Hamfest. The July general meeting has been moved to TSTC, because the library is closed on Independence Day. Also there will be NO V.E. session in July. V.E. testing will resume before the August meeting. The July meeting promises to be short and informal. I plan to bring my pictures from the Field Day effort and hopefully several others will do the same.

73, Joe

## *EDITORS NOTES*

First off, **THANK YOU VERY MUCH** Chip-N5LTZ and his XYL Janet for allowing the club and other participants to use your residence in Armstrong County for our field day site. Scores and a little more detail will be in next months newsletter. Also, we will get back to normalcy here with the continuation of packet articles plus other things that will be updated. Myself and Matt are still in a period of transition for getting stuff together for publishing. So stay tuned! And as always send in your stuff to the newsletter staff via the means below. Also, add the fact that I can now retrieve files via packet. My home station is on the air during the evening hours for now, as the radio is used in the mobile. The best way to leave a file will be on the AMA BBS.

73, Guy-WZ5C

### ***P.A.R.C. MEMBERSHIP RATES***

Full and Family	\$25.00 per year
Associate (Non-Voting /Newsletter only)	\$8.00 per year

### ***NEWSLETTER SUBMISSIONS***

All articles are due by the 20th of the month.  
You may send them via the following:

Internet: [guy.pigg@radio-online.com](mailto:guy.pigg@radio-online.com)

BBS: The Lumber Yard (806) 381-8247  
(Must be registered user)

By phone: (806) 372-8462 (An answering machine)

In care of: Panhandle Amateur Radio Club  
P.O. Box 10221  
Amarillo, Texas 79116

### **THE PARC SWAP SHOP**

700 XE w/117 DX Power Supply  
Heathkit SB102

Prices are open for discussion  
Contact Steve Close at (806) 374-0130

Items for the Swap Shop are open to anyone for just about anything. Submit your stuff through the means available on the left.

# Satellite Round Up!!!!!!!!!!!!!!

Howdy,

I hope you had the chance to do a little OSCAR operating either during Field Day or during the Field Day dry on the 17th of June. I can't speak for Field Day yet, but I think everyone at the dry run had a good time. Hams from as far away as Whitdeer, TX and Clovis, NM showed up to join in the fun. Everyone who showed up got to make several contacts via satellite. We worked satellites in both low and high orbits making both CW and SSB contacts. We even worked a little DX!

The dry run proved to be quite useful in pointing out some oxidized antenna connections and frozen bolts. It also made some better connection schemes obvious. Maybe I'm paranoid, but I like to work the bugs out before the contest. I also wish that I had taken my camera to the dry run. Oh well I intend to take pictures at Field Day.

## SPECIAL NEWS FLASH!!!! STS-71 SAREX FREQUENCIES ARE DIFFERENT!

Downlink 145.840MHz FM please do NOT transmit on this frequency! Uplink 144.450 MHz and 144.470MHz.

This mission will actually dock with MIR. The frequency change is to keep the very strong MIR signal from covering the weaker SAREX signal. Good Luck!

Next month we'll discuss Field Day results and lessons learned.

73, Joe
